

Ivan Sedelkin

Front-End/Back-End Engineer

Profile

As a newcomer to the industry, I have a lot of drive to work with cutting edge technology in order to develop application and/or anything to do with programming and data. I strive to develop my skills so that I can move up in the industry and provide this and future generations with an easier and fun life through what I develop.

My true passion lies within game development since that is what set me on the path of programming. I would like to, in the future, create games that will hopefully inspire and give ideas to kids in one way or another

Employment History

Basketball-Coach at Huddinge-Basketball Club, Stockholm

August 2018 – Present

My passion to Basketball has led me to take up coaching 14 year old teens three times a week. It is not the easiest job but the gift of seeing them progress and being part of their journey is more than enough.

Main skills learned: Responsibility, Empathy, Strictness, Leadership

Video Coder at Randstad, Stockholm

October 2018 – August 2019

This was a part-time job I did while I was in school. Main work involved supervising mail packages that were not recognized by the companies AI.

Main skills learned: Typing speed, work relations,

Construction worker at Expatia, Stockholm

August 2016 – June 2018

This part time job included task such as helping out the workers with bringing tools and materials for fixing the roof. If something where to be fixed on the ground even I could help then. This job also included painting window-frames.

Main skills learned: Discipline, Tolerance

Internships

Front-end/Back-end Developer at JustValue, Stockholm

January 2019 – May 2019

This was an internship I did where my task was to create a plugin for Wordpress that allowed the user to freely create forms and calculators using drag and drop. Although the plugin was for Wordpress, a lot of the work was done in JavaScript

Main skills learned: PHP, Javascript, CSS
